* - PL2303H, PL-2303HX (Rev A), and PL-2303X are EOL and discontinued chips and Prolific will not provide Windows 8 driver support. New driver versions will show yellow mark (Error Code 10) in Device Manager for these EOL chip versions under Windows 8. Prolific recommends using PL2303HXD chip.
Counterfeit Warning!!!

Please be warned that counterfeit/fake PL-2303HX Rev A (or PL-2303HXA) USB-to-Serial Controller ICs using Prolific’s trademark logo, brandname, and drivers, are being sold in the China market. Counterfeit IC products show exactly the same outside chip markings but generally are of poor quality and causes Windows driver compatibility issues (Yellow Mark Error Code 10 in Device Manager under WinXP, Vista, and 7). This warning is issued to all customers and consumers to avoid confusion and false purchase. Please purchase only from stores or vendors providing technical and RMA support.

Windows 7 Driver Installation

This section will guide you on how to install the PL-2303 Windows Driver. You can download the latest Driver Installer program from Prolific Support website:

Note: Please take notice of the installation order. First, run the Driver Installer Program before plugging in the USB to Serial adapter. If you already plug the device during the driver installation, you need to re-plug the device for Windows to enumerate the device and load the drivers installed. If your device is embedded to the system, you might need to restart the system (or click rescan hardware changes in Device Manager) to reload and install the driver.

The following steps will show how to install the device under Windows 7 (64-bit) OS as this is the most inquired driver installation support received by Prolific. The procedures are the same and straightforward for all other supported Windows operating system versions.
1. Power on your computer and boot to Windows. Run or double-click the PL-2303 Windows Driver Installer program.

2. The InstallShield Wizard will be displayed to inform you that the PL-2303 USB-to-Serial driver will be installed on your computer. Click Next to continue.
3. The PL-2303 Driver Installer program will then start to install the drivers needed.

4. Click the Finish button to close the InstallShield program. If you have plugged the cable into the PC while running the setup installation, please unplug and replug the cable for the system to detect the device.

![PL-2303 Driver Installer Program](image2)
5. Plug in the USB to Serial adapter to the PC USB port. Windows should detect the driver as Prolific USB-to-Serial Comm Port. Go to Device Manager and check for the “Prolific USB-to-Serial Comm Port” device and the COM port number assigned by Windows.

6. You can also check the driver version by right-clicking on the “Prolific USB-to-Serial Comm Port” device and select Properties and Driver tab.
Warning!!!
If you are encountering yellow mark (Error Code 10) for device in Device Manager under Windows XP, Vista, or Windows 7, you need to contact the cable vendor or manufacturer for possible counterfeit chip. Prolific does not manufacture or sell any end-user market products and will not provide or be responsible for direct support to end-users.
Windows 7 Driver Installation (via Windows Update)

This section will guide you on how to install the PL-2303 Windows Driver via Windows Update. You will need an Internet connection to be able to automatically download and install the drivers via Windows Update.

1. Check if your Internet connection is OK. Plug in PL-2303 USB to Serial cable.

2. Windows will automatically check Windows Update if driver is available and will download and install the driver instantly.
3. Windows will then prompt you that Prolific USB-to-Serial Comm Port (COMx) is installed and ready to use.
4. You can also right-click on the USB-Serial Controller device and click Update Driver.

* - New Driver does not support PL-2303H, PL2303HX (Rev A), and PL2303X in Windows 8. It will show a yellow mark (Error Code 10) in Device Manager similar to what counterfeit chips would show.

Check Chip Version Tool

Prolific provides a tool program together with the driver to check the chip version of your device for Windows8-ready driver support.

NOTE:

This tool will not work in Windows 8 if the PL-2303 device shows a yellow mark in Device Manager. You need to use Windows 7 or XP to run the tool program for discontinued chip versions.
Windows 8 Driver Installation

This section will guide you how to install the PL-2303 device in Windows 8 Operating System. You can download the latest Driver Installer program from Prolific Support website: http://www.prolific.com.tw/eng/downloads.asp?ID=31

1. Power on your computer and boot to Windows 8. Run or double-click the PL-2303 Windows Driver Installer v1.7.0 program.

2. The InstallShield Wizard will be displayed to inform you that the PL-2303 USB-to-Serial driver will be installed on your computer. Click Next to continue.
3. The PL-2303 Driver Installer program will then start to install the drivers needed. Click the Finish button to close the InstallShield program.

4. Plug in the USB to Serial adapter to the PC USB port. Windows should detect the driver as “Prolific USB-to-Serial Comm Port”. Go to Device Manager and check for the device and the COM port number assigned by Windows. You can also check the driver version by right-clicking on the “Prolific USB-to-Serial Comm Port” device and select Properties and Driver tab.
5. The COM Port number for the PL-2303 is assigned by the Windows Operating System. If you encounter a device that shows a yellow mark (Error Code 10), you need to check if that device is using an old version Prolific chip (PL-2303HXA or PL-2303XA) or a counterfeit chip. As mentioned in the previous sections, Prolific does not support old version chips in Windows 8.
Windows 8 Driver Installation (via Windows Update)

This section will guide you on how to install the PL-2303 Windows Driver via Windows Update. You will need an Internet connection to be able to automatically download and install the drivers via Windows Update.

1. Check if your Internet connection is OK. Plug in PL-2303 USB to Serial cable.

2. Windows will automatically check Windows Update if driver is available and will download and install the driver instantly.
3. Windows will then prompt you that Prolific USB-to-Serial Comm Port (COMx) is installed and ready to use.
4. You can also right-click on the USB-Serial Controller device and click Update Driver.
